DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed September 9, 2003 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., two-loop control system) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3761

3. Claims 11-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Gilmore et al. 5931160.
4. Gilmore et al. teaches an arrangement for a feed back control system connected to an anesthesia machine, the anesthesia machine having a controllable device/a gas mixer and ventilator 10, means receiving gas samples of the breathing gases of the patient/gas monitor 19 and providing a signal output; a user interface 26; a controlling device 12; means for periodically providing a signal to the controlling device; means for providing a signal serving as a reference for the operation of the controlled device (col. 10, lines 10-32); a selector valve (col. 9, line 3-12); at least one backup valve (col. 16, lines 5-8); a safety measure/disconnect (col. 17, lines 42-49); safety valve (col. 15, lines 57 and 63); and alarm (col. 17, lines 42-49).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
